The tasks were divided in the following order:

Assignment 3: Car Sharing application		
Requirement number	Description	Contributor Name
1	There will be a sign-up and sign-in feature for drivers and passengers	Miruna
2	Passengers should be able to enter the start and end destinations (for example, Eindhoven to Delft) in the main interface.	Vlad
3	Once the start and the destination places are entered, the system needs to show the path on Google Maps.	Vlad
4	Once the passenger clicks on the search button, the website will look for all trips going from Eindhoven to Delft (for all trips going from any location within 10 KM radius from Eindhoven to any location within a 10-mile radius from Delft). Since this is an HTML/CSS assignment, you will hard code these, but in the future, we will learn how to retrieve the data and display it on the page dynamically.	Miruna

The Site Map:

padding: 4%;">
                <p>
                    [Disclaimer: this is the first thing that came to my mind at 1am
and is basically dummy text]
                </p>
                <h1>
                    What is CarYe?
                </h1>
                <p>
                    CarYe is a car sharing application which lets people join trips
all over the world.
```

```html
                    It essentially functions as a carpooling service, letting you
either join or be joined on trips that would've happened anyway.
                    This way the car capacity is maximized, making a better use of
roads and improving traffic, as well as
                    contributing to fighting against pollution.
            </p>

            <h1>
                How does it work?
            </h1>
            <p>
                After having created an account, you can start looking for trips
via the homepage.
                    There you can tweak various filters, and find people who are
going where you need to be, at the right time and appropriate accesibilty.
                    You can also upload the trips you regularly make (with a
verified driver's profile),
                    and others can see and join in on them.
            </p>

            <h1>
                About our initiative
            </h1>
            <p>
                This website is made by a pair of TU Delft Computer Science and
Engineering students, for their
                    first year Database & Web Technology Course. I am now simply
wrting text which serves to purpose
                    as to make the about section longer in order to display the
'sticky' property of the iamges on the right.
                    I am putting way too much effort into this :)
            </p>

        </div>

        <div id="image-wrapper" style="position: sticky; align-self: flex-start;
top: 0; height: 100%; flex-grow: 1;
                                    background-image:
url(./resources/car-logo.png); background-size: cover;">

        </div>
    </div>
  </body>
</html>
```
